

# Desperate British Drive Continues; Germans Admit Defeat at Verdun and at Loos

Reading.

## Force Kaiser's Lines on the Belgian Front.

### French Consolidate Positions on Left Bank of the Meuse.

(By ATLANTIC CABLE AND A. P.)

London, Aug. 22.—The British troops, attacking fiercely again today, have captured important strategic positions for a mile along the Ypres-Mensin road, to a depth of nearly a third of a mile, and further to the north carried forward their front about a half-mile over an extent of two and a half miles.

The fighting, according to the official report from British headquarters tonight, was of the most desperate nature, the prisoners taken bearing a small ratio to the losses inflicted on the British.

BRITISH FRONT IN FRANCE AND BELGIUM, Aug. 22 (By Associated Press).—In the Langemarck-Tremecq sector of the Belgian front the British have forced their way to a commanding position into the German defenses and have been fighting in the neighborhood of Hill 22, the ridge where the Irish regiments were, fought back southeast of Ypres in a distant location, the British are meeting with determined enemy resistance.

BERLIN ADMISSION.

BRITISH FRONT IN FRANCE AND BELGIUM, Aug. 22 (By Associated Press).—The region of the Belgian front the British have forced their way to a commanding position into the German defenses and have been fighting in the neighborhood of Hill 22, the ridge where the Irish regiments were, fought back southeast of Ypres in a distant location, the British are meeting with determined enemy resistance.

BRITISH FRONT IN FRANCE AND BELGIUM, Aug. 22 (By Associated Press).—French troops have gained a foothold in the southern part of the town wood and on the knolls to the east of that position on the Verdun front says the official statement issued today by the German War Office.

The German statement also says that the French forced their way into the German positions in the southern part of the village of Sammangeux, on the east bank of the Meuse, were brought down.

Air Raid.

## GERMANS BOMB TOWNS ON COAST OF ENGLAND

Aviators Drop Bombs from Great Height and Do Considerable Damage—Three Reported Killed by Explosives from Teuton Airships—Injury to Buildings is Small—Airmen Attack from Great Height.

(By ATLANTIC CABLE AND A. P.)

RAMSGATE (Eng.), Aug. 22.—German airplanes today bombed this town from a great altitude. The bombs dropped by the aviators did considerable damage.

The machines were received with heavy gunfire and almost before they left the shore two big Gotha machines were hit and fell heading.

Other raiders dropped a number of bombs but as far as has been ascertained the only damage was the destruction of one house. For half an hour the incessant rattle of guns and the bursting of shells in the air were heard. Large crowds of residents of Margate and holiday visitors witnessed the action.

Margate, which has been bombarded twice by German airplanes, is purely a residential and pleasure resort. There are no military establishments of any sort in Margate except hospitals, for convalescents, and no factories.

Ten German airplanes approached the English coast on the county of Kent today, the British War Office announces. Two of the raiding machines were dropped at Dover (an important port on the English Channel) and at Margate. Three persons were killed and two injured. The statement says the raiders were unable to penetrate far inland.

DAMAGE IS SLIGHT.

An air raid warning was issued in London this morning. About half an hour later the report, "All clear" was made, indicating that the raiders had been driven off.

German airships made a raid off the Yorkshire coast last night. It is also announced officially. So far as has been ascertained, the damage inflicted was small.

The announcement follows:

"The enemy, in numbers not definitely ascertained, approached off the Yorkshire coast (in Northern England on the North Sea) last night. One of the raiders attacked the mouth of the Humber and was fired on by anti-aircraft guns. She dropped some bombs then made off to sea."

The damage so far reported is slight. One man was injured."

The communication issued by Lord

### STILL FORGING AHEAD.

The onward and upward march of The Times is shown by its remarkable midsummer advertising gain of 26,992 lines for the week ending Saturday, August 18, 1917, over the corresponding week in 1916.

No sane man or woman can read the authentic advertising records of the various Los Angeles newspapers and reflect on The Times year-in and year-out leadership, both in volume of advertising and in the number of separate advertisements printed, without being irresistibly impelled to the conviction that The Times gets its advertising patrons much better results than any other Los Angeles newspaper.

The Times gain in total advertising for the week ending Saturday, August 18, 1917 over the corresponding week of last year is 17,402 more lines than were gained by the second morning newspaper during the same period.

The following tabulation, with The Times as usual in the dominant position, shows the local advertising score for the week ending Saturday, August 18, 1917:

Total lines advertising	Separate want ads.
264,221	13,231
236,236	12,531
140,266	2,539
124,106	2,408
126,196	2,110
65,306	305

### Italians Pound On.

(Continued from First Page.)

front, the Italian War Department announced today. The Italians also have taken thirty guns.

Gen. Cadorna reports that the Italians have gained new successes along the northern battle line. North of Gorizia the operations are progressing regularly. To the south the struggle is localizing, especially on the Carso front.

The official statement follows:

"Along the whole front the battle is raging without let-up."

"Along the whole line of battle our troops have gained new successes and have to replace several of the positions they are occupying the difficulties which give to every yard of ground won and held the importance of a conquered fortress."

"Sentries of the air over the battlefield, especially in the Chivasso Valley and along the eastern slopes of the Hermida, making the enemy suffer losses and causing considerable damage to his communications."

The number of allied-bodied prisoners captured is 211 officers and more than 12,000 men. Thirty guns, nearly all of medium caliber, have been captured, and the losses are large and are increasing in quantity.

"On the Trentino and Carnia fronts, the enemy, yesterday again attacked small attacks, which were repelled."

"In the Carnia, our batteries destroyed all small reservoirs."

"On the Verdun front the enemy reacted during the course of the day with artillery, notably on the left bank of the Meuse, but did not attempt to attack our new positions."

"One of our heavy guns destroyed the understructure of an observatory at Romagne-sous-Escois."

"German airplanes last night destroyed all small reservoirs."

"On the Verdun front the enemy reacted during the course of the day with artillery, notably on the left bank of the Meuse, but did not attempt to attack our new positions."

THE CITY  
AND ENVIRONS.

For New Hampshire Folk.  
Many former residents of New Hampshire are expected to attend the Granite State's picnic at Sylvan Grove Saturday.

Will Talk to Grocers.  
A. H. Nafziger, vice-chairman of the State Council of Defense, will be the speaker at a meeting of the Southern California Retail Grocers' Association this evening at 255 Wilcox Building.

For Story Writers.  
The Los Angeles Short Story Club will meet next Saturday at 2:30 o'clock in the Y.M.C.A. Building, No. 115 South Hope street. W. E. Mason, a mining engineer, will read an original story. The meeting will be open to the public.

For Men's Services.  
George Sunday, son of the evangelist, will speak on a portion of Men's Bible classes at the Sunday tabernacle this evening at 7:30 o'clock. Plans will be laid for a great men's night during the revival, probably on September 12.

By a Child Plaintiff.  
Adèle Marcus, the 18-year-old girl plaintiff, will entertain members of the Elks Club at their weekly luncheon and meeting tomorrow noon at the Hotel Clark. The luncheon will be in the form of a farewell to the deputy organizers of the club. Dr. W. Schweitzer will be chairman and the silent booster will be L. C. Hoyt.

Issue Military Map.  
A map showing the locations of National Guard mobilization training camps, the national army cantonment camps, Reserve Officers' training camps, and government aviation sites will be issued to the public of the Rock Island for distribution.

The regular army departments are shown by solid dividing lines and are also marked. The new sixteen national army divisions are each shown in separate colors.

Will Greet President.  
Occidental College will extend a greeting to its new president, Dr. Silas J. Evans, on his arrival here this afternoon at 2:30 o'clock over the Salt Lake. The family of Dr. Evans accompany him. The new head of Occidental College comes from the University of Wisconsin, where he has been president of Ripon College, his alma mater. He was formerly professor of Hebrew literature in the University of Wisconsin.

Locate on War.  
Evangelist A. F. Ballenger will lecture in the Liberty Mission, Burbank Hall, Sixth and Main streets, Saturday at 7:30 p.m. He will speak at the Baptist Church, Forty-second and Monica at 2:30 p.m. Mr. Ballenger recently has returned from Washington, D. C., where he has studied the war situation. He also will speak on open-air lectures in Sylvan Grove, Sunday, at 11 and 3 o'clock.

Scamby Side.  
SAY GIRL CONFESSES.

Private Detectives Declare Young Cabaret Singer Admits Taking Checks from a Cafeteria and Cashing Them; Her Confession Held.

Mary Ladd, the 18-year-old cafe singer, who was arrested at San Diego on a charge of having uttered seditious checks, has admitted to private detectives it is alleged, that she stole three checks from a cafeteria on Hill street recently and cashed them on Broadway. They ranged in size from \$15 to \$5. It is said by Nick Harris detectives.

The Ladd girl was taken into custody with Harry Herrington, who is also charged with having circulated seditious checks. Herrington is said to have been going under three aliases, while the girl had two.

Before accompanying Herrington to San Diego, Miss Ladd supported herself by singing in cafes and working in cafeterias here.

PREFERS DEATH  
TO SERVICE!

Police Believe Youth Ended His Life in Order to Escape the Army.

Evidence secured by police detectives indicates that the unidentified man who committed suicide in a Japanese rooming-house at No. 533 East Fourth street late yesterday, ended his life in order to escape service in the Liberty Army.

Upon the person of the man, who was about 25 years old, was a registration card bearing the name of W. H. Hagel. Death resulted when he drank a bottle of iodine and fired a revolver bullet into his head.

In Demand.  
FATHERHOOD IS CRUX OF CASE.

Triangular Battle for Child Opens in Court.

Woman Says Boy was Deserted and Asks Custody.

Each of Two Men Claims He's the Real Parent.

One of the most peculiar triangle in the history of the county probation court was called for hearing yesterday afternoon when the boy, 10, son of Mr. and Mrs. Gladys, avenue was brought up. She asks that Edward Edward Enos, Jr., also known as William Edward Enos, Jr., be declared an abandoned child and that she be allowed his custody.

Two men, each claiming to be the father of the child, also have filed petitions to obtain control of the youngster.

William Edward Enos, a mining man, 35, of Los Angeles, has contracted a common-law marriage with Cordelia Roberts, also known as Mrs. Enos, and the child was born to them. Edward Gilham of Los Angeles also claims to have married the same woman and that the child is his.

The principal battle for custody will not be heard until 2 o'clock tomorrow afternoon, when Mrs. Curner's petition will be completed and the mother of the two will be heard.

The mother of the child died in January, 1915, and Mrs. Curner has had charge of him since that time. When her petition was filed, the two men estimated their claim.

R. O. Worley, a grocer, of House, Ariz., testified that he knew Mr. Enos and the woman claiming to be his wife and that she was his.

Attorneys representing both men who claim to be the father of the child have stipulated that a picture of the woman which was introduced into the trial of the mother, the wife of both. Each man said he was the husband of the woman.

Approximately the same time the other asserts she was his wife. However, neither of them will admit that the woman was the wife of the other.

Mr. Enos said yesterday that there was not a shadow of a doubt about the child being his. He said the boy favored him to an exceptional degree and that he had never heard the same statement. However, both men are of a different type.

Mrs. Gilham said she didn't know which one of the men is the father who was so worrying over that point. She said he was abandoned and wants the custody.

TOURISTS TO FLOCK HERE.

Hotel Manager Sanguine as to This Winter's Prospects.

Sam S. Porter, manager of the Edward Hotel, San Diego, is in Los Angeles on his way home after an extended tour of the Middle West. He says railroad men volunteered the information that California is the second largest and the biggest influx of tourists in its history. All the cities he visited were booming, he says, and there was but little war talk. Better were made in some cities that the war would end within six months.

"Our biggest asset is good roads," said Mr. Porter yesterday. "And we should unite to fight for them to the last ditch."

BUSINESS BREVITIES.

For quick action drop answers to Times' "Inliers." Times liner boxes are in government office buildings. The location of the boxes are printed in the first column of The Times' "Inlier" section.

LOS ANGELES (Loc Ahng-hay-ahs)

Editorial at the Post Office, main office of Class II.

MEMBER OF THE ASSOCIATED PRESS.  
The Associated Press is exclusively committed to the use for reproduction of all news committed to it or not otherwise committed in this paper and also the local news published herein.

THE ONLY WAY.  
Following wholesale arrests of the I.W.W.'s by military authorities the threatened strike in the Northwest have failed to materialize. There seems to be but one way to deal with the lawless gang and their treacherous leaders, and the government has at last begun to realize it.

THEN AND NOW.  
The Southwest Museum is in receipt of an official government census showing the population of Los Angeles in 1880 to have been 3229, more than half of this number having been Indians. Already the New York of the Pacific Coast, it is interesting to speculate on what the population of Los Angeles will be in 1950.

A KREADEY HERE.  
Fifteen Germans have been arrested in South Dakota for circulating a petition against the draft. "The Germans could not possibly come over here to bother us," said the petitioners when war was declared. They did not have to come. They were already here and the iron hand of the Kaiser has already been felt upon the throat of the nation.

SOUD CELLE.  
Somewhere in literature there is a book which states that it requires eighteen million years to develop a human soul, possessed of moral consciousness and the faculty of reason. The same book declares that every cell in the body of a man contains an embryo soul, capable of as great development as the man himself has attained and that the man, in turn, is only a tiny spark in one of the cells of the cosmic soul. But of what sort of complicated body does the Over soul form a cell? Aye, there's the rub! And there the author of the book, apparently able to go no further, drew the picture of an owl and wrote the word "Finis."

WANTS TO BE A WAR WIDOW.  
He asked for exemption on the grounds that he had a wife dependent upon him for support. His Betty Jane, hearing of his plea, appeared before the board and said: "I depend upon him for support? Why, I support myself and him with the laundry I conduct and with the eggs I gather from one hundred hens I care for, and I have to keep the money I earn hid or he would swing it and blow it at the saloon. Dependent upon him? Indeed! I hope you will send the little slacker to the war. I had rather be his widow than remain his wife. As his widow I would get a pension. As his wife I get only the privilege of supporting the little leaser."

THE NEW ARISTOCRACY.  
A Los Angeles minister recently delivered a discourse to his congregation on the subject, "The Struggle for Life Eternal." Is it necessary that one should strive for immortality? Is there any difference between the eternal and the life of the eternal? Now? Is not life, after all, a matter of mere realization, a concession to the overweening goodness of being? Though one should live forever, is it possible to live more than one moment at a time? When men shall come to know the worth and beauty of each passing moment the shadow of the past and the fears for the future will fade into the glory of the everlasting present.

PROPERTY OF ROOM.  
One local hotel manager attributes the great influx of visitors to Los Angeles to two special causes, the war in Europe and the heat in Arizona. The hotels are taxed to their utmost to house the soldiers and sailors and the Mississippians who continue to come for a breath of sweet sea air. Come right ahead, folks, and don't worry, for one minute about finding a place to stay. If the hotels are full there are thousands of rooming-houses that will be glad to welcome you—and if these, too, are crowded there's always room for another just somewhere among the sawyer foot hills or along the sands between Santa Monica and Long Beach.

CONCERNING ABSINTHE.  
The ascetic who denies, ignores or kills the little joys of life that come knocking at the door of his heart, in the hope that the pleasure despised will accumulate and overwhelm him with happiness supreme in some far-off heaven, may one day awaken to find his dream an illusion, born of self-delusion, and that his desire to escape the fleeting sweetness of existence has served no purpose except to teach him the folly of discarding the good things that the great God sends. If a man believes he can be glad in the bye-and-bye, what is to prevent him from claiming his inheritance to happiness now, and why may not his faith reach out to grasp the fair hand of destiny just as easily as his memory has backedward to kiss the lips of a glowing past?

Existing legislation indicates that the American public is about to undergo the experience of getting out of the war a degree of economic justice, so far as food and fuel are concerned, which they have not been able to achieve in a time of peace. And it is no credit to our intelligence that this is so. War is an unmixed evil.

THE SALOON KILL.  
National prohibition, State prohibition and municipal prohibition—certainly it never rains but pours! The United States Senate has passed by the requisite two-thirds majority the Shepard resolution which proposes to submit a prohibitory amendment to the Federal Constitution for ratification by the sovereign States. The Rev. Gandler and his white-ribboned crusaders in California propose to submit an amended Rominger bill as an initiative measure to be voted on at the next State election; another coterie of direct legislationists propose to submit an initiatory ordinance closing all the saloons and most of the family liquor stores in the city of Los Angeles. Plainly a farcical war is not to be permitted to deaden our ears to questions over which there is a conflict of opinion at home.

For some reason which has not been officially explained, the "bone dry" lobby at the national capital abandoned the fight for national prohibition as soon as the Shepard amendment was through the Senate. Possibly the faltering Washington summer climate may have been in part to blame; no other reasonable explanation has been vocalized—why the fight for the Shepard amendment should have been called off after the "dry" won what seemed an easy victory in the Senate. It has been announced that the resolution will not be discussed in the lower house until the regular Congressional session which convenes in December.

It is not '77 does not seem an especially propitious year for prohibition. One of the first acts of the provisional government in Russia was to repeal the prohibitory edict which, some assert, was responsible for the collapse of the house of Romanoff. National prohibition was urged in England, but later abandoned. Tommy at the front was inclined to resent bitterly the movement to close all the public houses while he was away. A part of his liberal education in France was the object lesson of how the "police" fight on a ration of a quart of wine daily, and he sent back vigorous protests from the front that the women folk should give his "al' and "al' at least 'all' a show while he was away.

There is a marked division of opinion in the eastern press concerning the advisability of plunging the States into a prohibitory campaign at this time. It is held by many that for the government to confiscate the stocks of liquor on hand and penalize further manufacture is to wholly ignore the rights of individuals under the Constitution. Ever since the republic was formed the right to manufacture and sell liquor has been recognized and legalized. Millions of money has been invested in a business legalized and regulated by the Federal government. To confiscate any business without compensating those who have money invested is a violation of the spirit of the Federal Constitution.

Many newspapers express surprise at a clause in the Shepard resolution which provides that it must be ratified by the required number of States within six years after its submission by Congress; but there is good reason for this clause in the resolution. There is no time fixed in the Federal Constitution for ratifying an amendment submitted by Congress. If there is no qualifying clause the campaign in the separate States might be dragged out indefinitely. After a proposed constitutional amendment has been adopted by Congress it becomes effective when three-fourths of the States have given their approval. If there were no time limit on the resolution the campaign might drag along for three or four generations.

That there will be another "wet" and "dry" campaign in the State of California in 1912 is generally conceded. The "dry" can secure enough signatures by spending \$2000 to place any form of amendment they like on the ballot as an initiatory measure. It is possible that enough volunteers will come forward to relieve the "dry" organization of the necessity of sending out hired solicitors. So long as the initiative is a part of the State Constitution, so long will the electors be plagued by single tax and liquor initiatives. The "dry" will circulate the petitions until such a time as they may win; then the "wets" will turn to and circulate other petitions to repeal whatever prohibition legislation may have been passed.

Under the terms of the Shepard amendment to the national Constitution the wine industry of California would be wiped out completely. One wing of the anti-liquor forces inside the State favors an amendment that would stop the sale of high-proof liquor but would not interfere with light wine and beer. Many of the wine men are pledged to support another Rominger bill.

While these two campaigns are getting under way there are a few enthusiasts in the city of Los Angeles who cannot content themselves to wait for the result of Federal or State action. They propose that an initiatory amendment should be circulated at once to close all the open bars within the city.

Repeatedly during the past The Times has asserted that it is opposed to the open bar and that it would give its support to a movement to drive the saloon—the world's worst misery-producer—from Los Angeles. But The Times has always questioned whether the use of raw nerve, the initiative, was the proper way to achieve the adoption of an anti-saloon ordinance. The initiative is an invention of unfair and unreasoning radicals. It is an unfair, crude and dangerous method of legislation. The initiatory amendments are not subject to general discussion, like proposed ordinances submitted to the City Council. They have always been beaten in the past because they were badly drawn. The Times scorns the efficacy of a measure that will close some of the saloons, but convert the restaurants holding liquor licenses into actual bar rooms and practical saloons where there will be more immoral and less regulation than in the saloons under present restrictions. A better way would be to introduce the proposed amendment in the Council and permit public opinion to help frame the measure. Under the initiatory a hard and fast measure is presented to the elector; he must answer the question simply by "yes" or "no." There is no opportunity to remove objectionable features or make improvements.

Many have hoped that the electors of the city might be spared a "wet" and "dry" local fight this fall by reason of the fact that prohibition is going to be both a State and national issue. Some of the temperance advocates themselves are asserting that a local liquor fight will injure the

## The Real Citizen Fixit.

chances of passing a State amendment along the lines of the late Rominger bill at the next State election. But the result of the local "wet" and "dry" fight will doubtless depend largely on the form of the amendment submitted. Unless the present plan of the local anti-saloonists miscarry the anti-saloon issue will come before the voters of Los Angeles, in November. Once more The Times declares that if the barrooms are to be closed, let them all be closed—restaurant bars, club bars and all. Disguised saloons are worse than open, restricted saloons.

WHIMPERING FOR PEACE.  
Like Arianna Ward, who was willing to sacrifice all his first wife's relatives on the altar of his country, the pacifists, from La Follette down to Werth, are for peace at any price—any sacrifice of national honor and safety, any terms that Germany may exact, on the fighting is stopped.

Germany had sunk with her submarine boats belligerent and neutral ships in violation of the regulations of international law as agreed to by the Hague Tribunal. She was pledged by solemn treaty to defend Belgium, instead of which she seized it.

occupied it, destroyed its cathedrals and art galleries, made slaves of its men, and

made them laborers in her munition plants and in her trenches in open and brazen defiance of the laws of civilised warfare.

She has poisoned wells in East Africa and dropped bombs on women and children in the parks of British cities and devastated Northern France.

occupied it, destroyed its cathedrals and art galleries, made slaves of its men, and

made them laborers in her munition plants and in her trenches in open and brazen defiance of the laws of civilised warfare.

She has poisoned wells in East Africa and dropped bombs on women and children in the parks of British cities and devastated Northern France.

Her triumph in this war would result in the demand of a money indemnity from us with fees of submarines and dreadnaughts in front of our Atlantic and Gulf and Pacific Coast cities to enforce the demand.

As a more economic and financial measure, it is cheaper for the United States to aid with money and with troops to exterminate the military autocracy of Mr. Hohenlohe than it would be to whimper at his feet and ask for the Stone, Verdun, La Follette, War peace.

WHAT IS A MAN?  
[Popular Science Monthly:] What is a man? How much is he worth from a scientific viewpoint?

According to one way of looking at it a man is worth about \$3.50 a day from his shoulders down and anywhere from \$50,000 to \$1,000,000 a year from his shoulders up. This may be said to be the sum of the average successful business man.

The scientist, however, looks at the question from another angle. According to him a man is worth \$24.50 for illuminating purposes, since a man weighing 150 pounds contains 3500 cubic feet of oxygen, hydrogen and nitrogen in his constitution, which at 70 cents per 1000 cubic feet equals the price above. Also a man contains enough carbon to make 8000 lead pencils; enough phosphorus to make 500 matches; enough water to kill 500 persons and enough water to fill a thirty-eight quart reservoir.

Furthermore, it makes no difference how sour a man may look he contains about sixty lumps of sugar, a great deal of starch, chloride of potash, magnesium, sulphur and hydrochloric acid in his system. There are fifty grains of iron in the blood of an ordinary man, enough to make one spike large enough to hold his weight.

What is a man? This is the somewhat cynical answer of one scientific man.

"Break the walls of 1500 eggs into a huge pan or basin and you have ingredients from which to form him, from his toe nails to the most delicate tissues of his brain."

They Only Fall Once.  
[Chicago Herald:] As the stage coach careened toward the edge of the cliff the timid tourist gazed anxiously down at the brawling stream 300 feet below.

"Do people fall over this precipice often?" she asked.

The driver clucked to his horses. "No, madam," he returned placidly, "never but once."

Don't spend all your time thinking about the war. Swat the fly occasionally. It will help a lot.

## STREAKS OF WIT.

The Shopping Problem.  
[Boston Transcript:] "Yes pay too high for the things we ate," said Mulligan to his wife. "Can't you find a grocery where they sell things lower?"

"No, Mike," responded Mrs. Mulligan. "There do be some places that sell things higher than others, but there do be none where they sell them lower."

On His Knees.  
[Chicago Herald:] "I think," she said, "that he has deserved us." "Mike," Mulligan to his wife, "Can't you find a grocery where they sell things lower?"

"Why not?" "Because right in the middle of a proposal last night his mind wandered, and he said: 'You could wear a size smaller without any trouble at all!'"

Filled the Specifications.  
[Christian Register:] "I'm very much afraid that Jimmie won't try hard enough," wrote an anxious mother to the teacher.

"Yes, you're wrong," wrote back the tired teacher. "Jimmie is the most trying boy in the class."

Both Askers of Riddles.  
[Boston Transcript:] "Taller: When are you going to pay me that bill?"

Owens: I declare, old chap, you remind me of my little nephew.

Taller: I do? Why?

Owens: Because you ask questions that for the life of me I can not answer.

A New Excuse.  
[Chicago Herald:] "Waiter, it is almost noon and I have not yet ordered that turtle soup."

Waiter: Sorry, sir, but you know how slow turtles are.

Ready.  
Servant (to Irish laborer): Here is beer, Pat, if you care to have it. But I'm afraid it's quite dead.

Pat: Oh, dead it is. Well, then, darling, it's myself who is just the boy to bury it.

Her First Cry.  
[Chicago Herald:] "Darling," said she, "do you love me as much as ever?"

You deserve," said he, with his nose buried in her newspaper.

That right to have her, I suppose, but she had to ask: "Why?"

"Oh, I dunno. Habit, I s'pose."

Giving Him a Scare.  
[Chicago Herald:] A young soldier had gone to the theater with a friend to perform such a degrading task as that of the paid tempter. One often wonders who of the mothers who belong to the Minnie Efficiency Association, which upholds and carries on this system—many of them good, intelligent women of high local standing, too—would care to see her own son engaged in such a profession. And one wonders just how many of our decent taxpayers would willingly contribute to the maintenance of such a department if they were fully thinking of all that it entails. If they were through but one session of that Women's Court and heard the unwholesome evidence, these paid tempters offer in our courts of "Justice" they would recoil with disgust from so utterly revolting a method of populating the women's department of the City Jail.

An erring sister making her final effort to go straight has been the victim of this vicious organization. They may have the strength of will to resist temptation, yet we actually pay men to go out to ensure that temptation shall seek them. There are precious few women so callous as to be swayed by the voices of vice, that they could fit through one of these small pinholes cases unawed. They can convert a man into an "anti" into a raging satyr.

We are about 300 men in the Army and Navy in the Rhine. When we are not in sufficient sleep and rest, we are not fit for the heavy loads without which we are.

Everything is going in an advance of 300 men. In extreme cases, the results of army life will result in the death of men.

Speaking of men, we are testing in the military camp.

Did not the men of the present age, in the army of Germany, show a remarkable spirit of self-sacrifice? They are not so afraid of the heavy loads without which we are.

President Wilson has signed a bill to the Senate, giving the men of the present age a chance to serve in the army of Germany.

Opposition to the new bill is strong, however, and the German people are not so anxious to go to war.

When we are in the army of Germany, we are not so afraid of the heavy loads without which we are.

It is a good idea to go to the army of Germany, but it is not so good to go to the army of France.

It is a good idea to go to the army of Germany, but it is not so good to go to the army of France.

It is a good idea to go to the army of Germany, but it is not so good to go to the army of France.

It is a good idea to go to the army of Germany, but it is not so good to go to the army of France.

## PEN POINTS

BY THE STAFF.

It looks as if the Kerensky boys ought to play in a bit closer. They require a lot of crabs part of a hunter to shoot at them. Would it be proper to speak of the Red Cross girls as "cusses"?

Smugglers of smoking should not have partners. This war will not be won standing when the band plays Star Spangled Banner.

Found Deterioration in Spanish War.

Health Show Effects of Intensity of Life.

The next will be women as train conductors. And not? Don't they have a weakness wanting to run things?

Twenty dollar bags are quoted. They are certainly aristocrats of the purse. In reality, a former army man examined hundreds of bags and other points.

The government is now giving 57 cents an ounce for silver coinsage purposes. Three of us are to be given.

Herbert Hoover is now trying to determine whether the food. Leave it to any summer.

Baseball will not be without useless things if it trains hard and hurls grandmas far, fast and

delightful.

## COUNCIL CONSIDERS BRIDGE PROBLEM.

(LOCAL CORRESPONDENCE)

RIVERSIDE, Aug. 22.—What to do with the Victoria-avenue bridge over the Tuquesne arroyo, which has been the subject of various engineering reports as to its condition, will be the subject of another examination before the City Council decides to close the structure and replace it with a concrete structure. Mayor Ford was an engineer yesterday to secure the services of County Surveyor A. Bourne, the bridge and report as to its safety. The report is unfavorable, the bridge to traffic. A new structure would be financed by a bond issue or constructed under a district assessment plan.

Delightful.

## HEAR GOLDEN NOTES.

BETTY BEACH YAW GIVES CONCERT AT CAMP CURRY AND LISTENS WITH AUDIENCE AS ELLIE ECHOES COME BACK FROM WALLS OF YEMMIE.

(LOCAL CORRESPONDENCE)

CAMP CURRY, Aug. 22.—Between nightfall at 7 o'clock and the Firefall after Point Point at 9 o'clock, night gave into the 100 guests of Camp Curry listened to the musical programme of singing by Ellie Echoes. Standing at the edge of the tall pine and lighted by the playing girls of the campfire Miss Yaw felt the impact of her surroundings and, following her delightful rendition of Ambrose's "Mad Song from 'Hamlet,'" she generously showed her delighted audience some of her own songs, including "Home, Sweet Home." As Yaw moved among the dim woods and in all, Miss Yaw gave a glimpse of her American acting, too rare nowadays, for "relics" of the haunting melody. Then for "relics" she sang her own "Skyline" and "Caravan," and after Nevin's "Rosary," moved the people to fine "merriment" again with "Graener's "Laughing Song," and "Eckard's "Echo Song." In singing the latter and in all, Miss Yaw took advantage of the surroundings and listened with her audience for the echo school coming back from the dark walls of Yemmie.

Miss Yaw was accompanied by Glenn Head Littell, and preceded by George Wharton James gave his illustrated lecture on the "Apache Indians" before the concert. This evening Fred Emerson Brooks gave reading from his own jolly sketches and stirring California poems at the campfire.

FULLERTON COUPLE QUIETLY MARRIED.

F. H. HILLMAN OF SAN FRANCISCO, WHO IS HERE TODAY, AND WAS MORE THAN PLEASED WITH THE DAY'S DEVELOPMENTS AT BOTH LEADS.

Also OBTAINS A PRODUCER IN MONTEBELLO HILLS.

LATTER COMPLETES PROVING UP OF THE TERRITORY.

(LOCAL CORRESPONDENCE)

WHITTIER, Aug. 22.—Oil development in the county took a big leap forward today with the announcement by the Standard of the bringing in of two new wells.

One in the Murphy-Coyote lease, near here, is doing 10,000 barrels daily.

making it the biggest producer in the State at present; the other, the Baldwin-Montebello lease, is doing 400 barrels daily, and gradually completing the proving up of 1,600 acres of oil territory.

Murphy-Coyote No. 12 early this morning was reported as producing 10,000 cubic feet of gravity oil and 5,000,000 cubic feet of gas per day. This production was increased during the day and this evening Standard officials stated that the well was producing 10,000 barrels of oil, 4,000,000 cubic feet of gas and that the gravity had increased to 22. The well proves up some new territory. At this distance are two other good producers.

(LOCAL CORRESPONDENCE)

UNDER PERFECT CONTROL.

No. 12 is 4072 feet deep. One admirable feature of the big gusher is that by the recent installation of the new separator machinery the Standard is able to use this immense flow of gas with safety.

Also the well was brought in under perfect control. Oil men of the State remember the big gusher of two years ago that "leaked away," burned its derrick, and when away under control again was producing 10,000,000 cubic feet of gas. With the Standard uses all its time.

The bringing in of No. 2 on the Baldwin-Montebello lease today marks the proving of the greatest new oil field in the State this year. Its success is practically assured, as the Standard already had

ASKING A ROAD.

A large delegation of ranchers  
living in the Santa Monica Moun-  
tains will invade the rooms of the  
Board of Supervisors to demand  
that the board start condemnation  
proceedings for the establishment of  
a public road for their use. Under  
the recent decision of the State Su-  
preme Court, the road formerly  
used by the ranchers is no longer a  
thoroughfare.

EMPLOYEE, NOT FRIEND.

That Miss Vera Warren, the Whit-  
ing girl who was found by the  
police after a long search in the  
home of Julius Pollack, No.  
321 South Vondome street, was an  
employee, not a friend, as reported,  
was the statement yesterday of Mr.  
Pollack. My, he was surprised to  
find that the "W.T.C.A." he said,  
"and we knew nothing of her ant-  
ecedents."

## CITY DEMANDS NATURAL GAS.

Will Act upon the Decision of Railroad Commission.

Standard of Heat Units Must be Provided All Patrons.

Lower Fuel to be Inducement to Factory Interests.

The ruling made Tuesday by the State Railroad Commission delegating the power to the city of Los Angeles to determine the number of heat units that gas served to the public must contain, was followed yesterday by considerable activity around the City Hall. Mayor Woodward conferred with City Attorney Stephens on the subject and requested him to institute proceedings at once to obtain natural gas or, if a mixed quality is used, compel the companies to furnish a standard of 1800 heat units.

Commissioner O'Farrell, who has been investigating the gas problem, said the ruling of the commission fixing the price of gas to industrial concerns at 20 cents per 1000 cubic feet should stand in view of the activity in the manufacturing line.

A representative of one of the gas companies yesterday declared that the ruling of the Railroad Commission was in accordance with an agreement reached at conference on March 7 between President Lane of the Utilities Commission, Chief Engineer Howell of the Board of Public Utilities, City Attorney Stephens and members of the Railroad Commission. The agreement, he said, was as follows:

The Railroad Commission will exercise jurisdiction over the fixing of rates, including the payment and repayment of deposit and installation of meters.

The city of Los Angeles will exercise jurisdiction over extensions and service connections, the quality of the commodity served, the efficiency of the service, including the inspection of meters, the adjustment of disputes between and all so-called police regulations.

The Railroad Commission will exercise entire jurisdiction over telephone and telegraph rates, services and extensions.

The city of Los Angeles will exercise jurisdiction over so-called "police regulations."

In general, the State Railroad Commission will exercise jurisdiction over all rates, while the Public Utilities Board, in the case of gas, electric and water utilities, exercises jurisdiction over extensions and service connections, the quality of the commodity and efficiency of service.

Should the consumer, the utility company, the city or the State, contest the jurisdiction of either party, the case will go to the Railroad Commission, which will make a ruling, and then an appeal can be taken to the Supreme Court.

## The Public Service.

At the City Hall.

## OBJECTION MADE TO SWITCHING CHARGE.

SANTA FE ASKS DECREASE OF PACIFIC ELECTRIC.

Question Discussed Yesterday at Important Conference Attended by Transportation Heads and City Officials—Matter Continued Until Next Monday.

The question of charges to be made for switching cars in the harbor terminal district was discussed yesterday at a conference held by representatives of the three transcontinental railroads, the Pacific Electric, and city officials. Objection was made to the terms proposed by the Pacific Electric, the Santa Fe declaring them exorbitant.

The Pacific Electric is acting as the city's agent in handling cars over the municipal belt line. The conference will be resumed next Monday, when all parties concerned that the difference will be adjusted. Mayor Woodward and members of the Harbor Commission attended yesterday's conference.

—Protests Sustained.

Protests against the improvement of Hobart boulevard between Second and Third streets, Manchester avenue, from its easterly boundary line to the easterly boundary line of the city, and Fies street, from Queen Anne place to the westerly boundary line of the city, were sustained yesterday by the Council and the proceedings were ordered abandoned.

Create Two Positions.

The Council yesterday adopted an ordinance creating the position of assistant police court defender and stenographer in the office of that department.

To Build New Bridges.

Money to pay one-half the cost of construction of bridges over the Los Angeles River at Diaz street was appropriated yesterday by the Council. The other half will be paid by the Public Service Commission.

—Fines.

WIND UP ACCOUNTS.

Distribution of Four Hundred Thousand Dollars Remaining in Million-dollar Estate of Victor Fennet is Ordered by Superior Court Judge.

Superior Judge Wellborn yesterday ordered the distribution of \$486,554 remaining in the estate of Victor Fennet, after approving the final accounting. There had already been distributed \$866,900.

Mrs. N. J. Fennet, the widow, and Mrs. Gertrude E. Fennet, a daughter, were the principal beneficiaries. Various Catholic organizations were remembered in the will.

## REAL WAR DOGS ARE BORN HERE.

Government's Cross Between Sheepdog and Airedale First Reached.

The first Red Star war dogs in America, so far as known, were born yesterday at Anokia, Mrs. Anita M. Baldwin's ranch at Santa Anita. They are a litter of puppies resulting from crossing the Old English sheep dog with the Airedale—the cross recommended by the United States government for the purpose. Bushnell True mothered the puppies and Postmaster of Anokia, the sire.

Red Star dogs differ from real hounds in that they are real hounds. They attack the enemy singly and in force, act as scouts, messengers, pilots and to drag gun carriages. Frequently they are used in No Man's Land and for cross-country work, in which they are usually disguised by tying tree branches to their backs. The sheep dog strain supplies great muscular strength and endurance while the Airedale gives a high degree of intelligence.

## HE'S IN ARMY NOW.

As Result Motion-picture Man Can't Pay Fat Alimony Ordered.

Tom Forman, a motion-picture director, has been awarded \$20 a week alimony in court recently for the support of his wife, Mrs. Ruth Forman, in the trial of her divorce suit, which is set for October 1. Yesterday her attorney, Henry G. Bodkin, asked the court for an order for the money.

But a problem has cropped up. Mr. Forman, being of draft age, is with Uncle Sam, and he will draw \$20 a month instead of the fat stipend as a film director. Hence he will have only \$18 a month.

The case is called the difference in his financial standing will have to be taken into account, it now appears.

## CITY JOBS AVAILABLE.

There are twenty vacancies to be filled in the police department and the Civil Service Commission will hold an examination at an early date to secure a sufficient number of men for appointment. Examinations for the following positions also will be held: Chain gang guard, deputy oil inspector, humane officer, engineer, (mail department), deputy public defender (female), caretaker (Detention Hospital), book repairer (public library), lineman's helper, apprenticeship, blacksmith, blacksmith's helper, carpenter's helper, plumber's helper, stone mason, bath attendant and printer.

## INVITING FIELD IN ANTIPODES.

Opportunities.

Lively Market for American Manufacturers.

Farm Machinery Especially in Strong Demand.

Government Expert is Here to Advise Exporters.

Since November of 1915, commercial conditions in South Africa, Australia, New Zealand, have been under investigation, so far as they concern the business interests of United States business men, by Juan Hom, commercial agent for the Bureau of Foreign and Domestic Commerce, Department of Commerce, at Washington.

Information of practical value to manufacturers in California has been accumulated and compiled by Mr. Hom and in order to acquaint Los Angeles manufacturers with these facts, he is now in this city with headquarters at the trade extension bureau of the Chamber of Commerce.

Information in connection with agricultural machinery requirements was the principal object of the man's visit to South Africa yesterday.

"The depletion of the man power of South Africa, Australia and New Zealand on account of the war has made it necessary for those manufacturers to utilize larger machinery in greater amount than ever before. Australia does not permit immigration, except whites, having closed her doors to Asiatics, negroes and Chinese, according to

Mr. Hom. He visited all of the important points in the South African Union, traveled through Rhodesia and into Portuguese territory, spending a week in each. Los Angeles manufacturers found American railroads, American locomotives and American rolling stock practically everywhere. Expenses on the average, are about the same as here.

Ovens are used principally in Africa for draught purposes, while labor is so cheap that for agricultural machinery is not used. Such machinery, however, is usually of American make.

In Australia they use the heavily-built, English machinery almost exclusively, although the Argentine steers are using American machinery.

American machinery is much more desirable in every way. Conditions are about the same in New Zealand.

"American manufacturers will find a great market in the country which I have recently visited. American goods and machinery have an excellent reputation. An American tractor that will do the work of eight horses will cost about the same money while it will do three times the work and never tire. The same harvesting machine used in California will produce excellent results in Australia and Africa. Now is the time to introduce them there. Our seasons alternate so that reasonable machinery used in the States for six months will be employed in Aus-

## HALF-DOLLAR MORE FOR MEN.

County Cannot Hold Laborers at Present Wages, So It will Make Increase.

Wages of laborers in the employ of the county road department are to be raised 50 cents a day. The step is due to the fact that the county cannot hold the men at the present salary rate of \$2.50 a day for unskilled laborers and \$2.75 to \$3 a day for skilled labor, as the laborers are leaving the service of the county to fill positions elsewhere at increased rates.

Between \$600 and 700 laborers will be affected by the salary raise. There will also be an allowance for the 100 teams employed by the road department. This means, according to the Supervisors, that the 20 per cent increase in salaries must be met by cutting down the work on the county roads, as the budget, which is already made up, cannot be changed to meet the emergency. The Board of Supervisors will discuss the raise and take definite action within a few days.

The plaintiff alleges his wife is "handed and detained" at the headquarters of "Queen Saint Ella."

However, Attorney MacBeth said he believes firmly the woman was kept practically a prisoner by the "Queen" induced Isola Irwin to leave her husband, by rep-

## "SAINT" ELLA IN ALIENATION SUIT.

HUSBAND DESERTED BY WIFE ACCUSES CULT LEADER.

Declared His Spouse is "Harrowed and Detained" by Negro "Prophet" and Her Husband and Asks Judge for Fifty Thousand Dollars.

SHIPPERS DOING PART.

Get Better Freight Service, with Fewer Cars, in June.

General Manager Walls of the Santa Fe issued a statement yesterday showing how the railroads of the country, with an increase of equipment of only 1 per cent, rendered nearly 25 per cent. more freight service in June this year than in the same month last year. These figures are contained in a report on freight operation just received by the commission on car service of the railroad was posted.

"Shipping in this territory," declared the Santa Fe's general manager, "are doing their part, as freight traffic could not have been increased to such an extent without prompt and intelligent responses by the shippers to the request to load cars to full capacity."

resenting she had been summoned to preach the gospel of Queen Saint Ella. It is alleged further that the woman was induced to leave her home because Mrs. Irwin said if she left, she would be safe. "She is a member of the hood-washed band who would have seals on their foreheads and who would be accepted into heaven by golden chariots."

Attorney MacBeth said he attended a recent Sunday meeting of the cult and noticed more than forty worshippers mostly white people.

The plaintiff alleges his wife is "handed and detained" at the headquarters of "Queen Saint Ella."

However, Attorney MacBeth said he believes firmly the woman was kept practically a prisoner by the "Queen" induced Isola Irwin to leave her husband, by rep-
